Profile

As a full-stack developer and United States Marine Corps veteran, I bring a unique blend of technical skills, leadership, and problem-solving abilities to any project. With experience in web and mobile development, I have a strong foundation in various programming languages, including:

> JavaScript, React.js, Next.js, HTML, CSS, SQL, GraphQL, and many other tools/languages used in software applications.

In the Marines, I learned the importance of attention to detail, the ability to work well under pressure, and the value of teamwork. These skills, combined with my passion for technology, make me an asset to any team.

Employment History

Full-stack Software Engineer , Prime Digital Academy, Minneapolis, MN

SEPTEMBER 2022 — FEBRUARY 2023

This accelerated full-stack development course is designed to teach students the skills and technologies needed to become full-stack developers in twenty weeks.

> Experience using Git, React.js, HTML, CSS, JavaScript, node.js, express, several other code base libraries, database management systems (SQL), and server deployment.

My most recent project was an application called Go Move. GO Move is a Solo Developer Full-Stack application to enhance the productivity of Medical Doctors, Physical Therapy Professionals, and Trainers in creating Health & Recovery Programs for their clients.

Security Officer , Fairview Health Services, Woodbury, MN

FEBRUARY 2021 — SEPTEMBER 2022

As a hospital security officer, I was responsible for maintaining the safety and security of the hospital facility and its patients, staff, and visitors. This included patrolling the hospital grounds, responding to emergencies and incidents, and enforcing hospital policies and procedures.

In this role, I gained valuable experience in crisis management and de-escalation techniques, as well as a deep understanding of hospital protocols and procedures. I also developed strong communication and customer service skills. I was often the first point of contact for patients, staff, and visitors and needed to handle a wide range of inquiries and concerns professionally and compassionately.

Working as a hospital security officer required a high level of attention to detail and the ability to work well under pressure. I was often required to make quick decisions in fast-paced and potentially high-stress situations. I also learned the importance of teamwork and collaboration as I worked closely with other members of the hospital security team and various hospital departments to ensure the safety and security of the facility.

Founder , Die A King

MAY 2021 — JUNE 2022

As the founder of this startup, I had the opportunity to bring my business idea to life and lead a team to turn it into a successful company. This required a wide range of skills, including entrepreneurship, strategic planning, and project management.

Starting a company from the ground up required me to identify a market opportunity, develop a product or service to meet that need, and create a business plan to guide the growth and development of the company. I was responsible for sourcing funding, building a team, and overseeing all aspects of the business, from product development and marketing to sales and customer service.

This experience taught me the value of perseverance and the importance of having a clear vision.

Technical Intern , Experience Shindig, Seattle, WA

FEBRUARY 2020 – JULY 2020

As a technical intern for a startup, I had the opportunity to work closely with a small and dynamic team of developers and contribute to developing a new product. In this role, I gained valuable experience in the software development life cycle and learned about the challenges and rewards of working in a startup environment.

U.S. Marine (Sergeant) , U.S. Marine Corps

MAY 2016 – MAY 2020

Served three years as a Special Reaction Team Member, leading the Sniper Team, Instructing Advance Firearm Courses, Participating in Personal Protection Operations, and collaborating with Federal Agencies was an enlightening and challenging experience that taught me through experience how to overcome the most daunting challenges.

This is a list of the few opportunities and successes:

- Aided in protecting the South Korean President (Moon Jae-in).
- Trained and acted as opposition for FBI Hostage Rescue Teams, DEA SWAT, Metro SWAT, and others, testing their capabilities and providing realistic and fluid scenarios.
- Graduated as the 'Top Operator' from SWAT school (Honor Graduate).
- Graduated from Prince William Police Academy with top 3 academic marks and top marksmanship with a 99.67% accuracy (Missing one time in a 300-round course of fire).

I finished my career instructing and leading Military Policing Operations as a Patrol Sergeant, leading a platoon of Marine Military Police Officers and thirty Federal Law Enforcement Officers.

Education

Full Stack Software Engineering, Prime Digital Academy

FEBRUARY 2023

This accelerated full-stack development course is designed to teach students the skills and technologies needed to become full-stack developers in twenty weeks .

This accelerated full-stack development course covers a wide range of topics including front-end technologies such as HTML, CSS, and JavaScript, as well as back-end technologies like server-side languages, database management systems, and server deployment.

As a student in this accelerated course learned about agile development methodologies, version control systems (e.g. Git), and project management tools. This course also includes hands-on projects and exercises to give students practical experience building full-stack applications.

Overall, an accelerated full-stack development course is a fast-paced and intensive way for students to learn the skills needed to become a full-stack developers.

Business Management A.S. , Century College

DECEMBER 2022

The associate of science degree in business management curriculum included coursework in various business-related subjects such as accounting, finance, marketing, human resources, operations management, and business strategy. In addition to these core business courses, students may also be required to complete coursework in economics, statistics, and communication.

Computer Science, The Citadel, Charleston

Developed Computer Science skills and completed degree requirements. Due to the financial burden of attending The Citadel, I join the military to pay for college.
